SUMMARY

Full-stack software developer with internship experience shipping web and mobile features end-to-end. Comfortable with Java/Spring Boot and MERN, plus Flutter for cross-platform apps. Strong in REST APIs, SQL/NoSQL, and production debugging. Looking for a Software Developer role where I can build scalable services and polished UIs.

SKILLS

Languages: Java, JavaScript/TypeScript, Dart, Python.
Backend: Spring Boot, Node.js/Express (REST, JWT/RBAC).
Frontend: React, HTML/CSS.
Databases: PostgreSQL, MySQL, MongoDB.
Cloud/DevOps: AWS (EC2, S3), Docker, GitHub Actions (CI/CD).
Testing/Quality: Postman.
Other: Linux, Git, XMRig (Monero Mining).

EDUCATION

B.Tech in Computer Science Engineering
KDK College of Engineering, Nagpur
CGPA: 7.83, Graduated: 2025
Higher Secondary Certificate (HSC)
Vijay Nimbalkar Jr. College
Percentage: 89.8%, Year: 2021

INTERNSHIP / EXPERIENCE

AI & Data Analytics Intern

SHELL | April 2025 – April 2025

- Worked on real-world sustainability datasets using Python in Google Colab, performing regression and clustering to analyze patterns in carbon emissions and pollution trends.
- Developed an interactive data visualization dashboard using Matplotlib and Seaborn, simplifying the interpretation of complex environmental metrics for stakeholders.
- Collaborated on an AI-based forecasting model aligned with UN Sustainable Development Goals (SDGs), assisting in data cleaning, model evaluation, and trend prediction.

Full Stack Web Development Intern

EY GDS | Dec 2024 - Jan 2025

- Developed and deployed full-stack web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js), focusing on scalability, modular architecture, and responsive design.
- Applied AI tools in web development workflows, enhancing automation and improving performance through intelligent components and dynamic data rendering.
- Followed UI/UX best practices to design intuitive user interfaces and improve accessibility, ensuring a seamless user experience across devices.

AWS Academy Graduate

AI-ML INTERNSHIP | May 2023 - July 2023

- Completed hands-on training in machine learning using AWS cloud services, applying supervised and unsupervised learning techniques.
- Learned setup and working of Amazon EC2 using the free trial from AWS.
- Explored supervised and unsupervised learning algorithms, including regression, classification and clustering

Salesforce Admin

CSM IT INTERNSHIP | March 2023 - May 2023

- User Management: Created and managed user accounts, roles, profiles and permissions for a user base of 5 users.
- Implemented an automated email verification system, reducing manual verification workload by 40%.

PROJECTS

News Feed App - (Flutter, Dart, REST API, SQL)

<https://github.com/sahilmyadav/newsapp-flutter>

- Developed a real-time news aggregation app using Flutter and Dart, integrating NewsAPI.org to fetch breaking news, with backend storage via SQL for bookmarking and offline reading.
- Designed a reels-style vertical scroll interface for immersive article browsing, applying UI/UX best practices to create a fast, responsive and user-friendly experience.

Travel Website - (MongoDB, Express.js, React, Node.js)

<https://github.com/sahilmyadav/travel-website-mern-stack>

- Built a secure, full-stack travel planning platform with JWT-based authentication, role-based access control, and an admin dashboard for managing users, trips, and bookings.
- Integrated advanced search, filter, and real-time booking features with a fully responsive React UI, delivering a seamless user experience across all devices.

Forest Fire Detection System - (Python, TensorFlow, OpenCV)

<https://github.com/sahilmyadav/firedetection-Ai>

- Trained CNN with augmentation; 92% accuracy / 0.91 F1 on held-out set. Built OpenCV inference pipeline running at [actual FPS] on CPU with alert logging.

- Applied image classification, data augmentation, and real-time image analysis using OpenCV, enhancing early detection capabilities for wildfire risk management.

Monero Cryptocurrency Mining Project - (XMRig)

- Configured and managed a high-efficiency mining operation using XMRig software on optimized hardware, leveraging blockchain protocols and RandomX algorithm to achieve consistent hashrates for Monero (XMR) extraction over 7-8 months.
- Mined 4 Monero coins valued at approximately 1.16 lakh INR (as of July 2025), showcasing expertise in cryptocurrency mining, resource allocation, performance optimization, and secure wallet management while adhering to energy-efficient practices.
- Automated node monitoring with systemd + Bash; added health-checks, log rotation, and auto-restart; tuned I/O and fd limits to improve stability

ACHIEVEMENT

- Full-Stack Web Development Intern – EY GDS & AICTE (2024, 6 weeks).
- AI & Data Analytics Virtual Internship – AICTE & Shell India (April 2025, 4 weeks).
- AI-ML Virtual Internship – AWS Academy (May–July 2023, 10 weeks).
- Salesforce Admin – CSM IT Services (May 2023, 1.5 months).
- AWS Cloud Foundations – AWS Academy (June 2023, 20 hours).

RESEARCH PAPERS

- Developed "News Feed App" (Flutter, Dart, NewsAPI.org, SQL): Built a real-time news app with a reels-style UI, optimized for UX; presented at SPARK National Conference 2024, showcasing innovation.
