## SUMMARY

Full Stack Developer experienced in building scalable web applications using React, Next.js, Node.js, TypeScript, and AWS. Skilled in developing end-to-end solutions, REST APIs, multi-tenant SaaS platforms, and AI-powered integrations. Passionate about building efficient, user-focused products.

## EXPERIENCE

### Full Stack Developer | Particle14 Infotech | Dec 2025-Present

Remote | Tech: Next.js 14, TypeScript, Node.js/Express, MongoDB, Tailwind CSS, Docker, VPS, Flutter, OpenAI API

- Built and shipped client projects end-to-end in a startup environment using React and Node.js (UI, APIs, integrations, and feature delivery).
- Integrated OpenAI (ChatGPT) API with optimized prompt engineering to automate accurate and formatted receipt generation for clients, and authored comprehensive technical documentation.
- Developed cross-platform Android applications using Flutter and managed end-to-end deployment, containerization (Docker), and hosting on Virtual Private Servers (VPS).

### Full Stack Web Developer | Fireblaze Technologies Pvt. Ltd | Oct 2025 – Dec 2025

Nagpur, Maharashtra (On-site) | Tech: React, Tailwind CSS, Node.js/Express, PostgreSQL, AWS EC2, Vercel

- Built features for ShikshaSaarathi (multi tenant SaaS for coaching institutes) incl. enquiry/lead and HR onboarding modules using React, Tailwind CSS, Node.js, and PostgreSQL.
- Implemented strict tenant isolation (organization\_id scoping) across APIs and PostgreSQL queries, ensuring secure tenant data isolation and preventing cross-tenant access.
- Built subdomain-based tenant routing for custom organization subdomains; resolved tenant context from request host.
- Deployed backend on AWS EC2 and frontend on Vercel; added IP allowlisting for selected tenants; handled production debugging, hotfixes, and releases.

### Full Stack Development Intern (Edunet Foundation) | EY GDS | Dec 2024 – Jan 2025

Remote | Tech: MongoDB, Express.js, React, Node.js (MERN)

- Developed and enhanced MERN-stack applications while gaining hands-on experience in full-stack development and REST API integration.
- Integrated REST APIs and implemented dynamic data rendering in React to improve user experience and performance.

### Salesforce Administrator Intern | CSM IT Services | March 2023 – May 2023

Remote | Tech: Salesforce Admin, Workflow/Validation Rules, Process Builder

- Implemented an automated email verification flow that reduced manual verification workload by ~40% (as reported in internship output).

## PROJECTS

### News Feed App | Flutter, Dart, REST APIs, SQLite

<https://github.com/sahilmyadav/newsapp-flutter>

Built a real-time news aggregation mobile app using NewsAPI and implemented a Reels-style, vertically scrolling reading experience with a responsive UI and clean navigation.

### BillEase | Spring Boot, React, MySQL, JWT, REST APIs

<https://github.com/sahilmyadav/BillEase>

Built a full-stack POS/billing platform with secure REST APIs for products, orders, users, and billing workflows, implementing JWT-based authentication and role-based access control (RBAC) to separate admin and staff actions.

### Forest Fire Detection System | Python, TensorFlow/Keras, OpenCV

<https://github.com/sahilmyadav/firedetection-Ai>

Trained a CNN image classifier using data augmentation, preprocessing, and iterative experimentation, achieving ~92% accuracy and ~0.91 F1 on a held-out test set and improving robustness across varied lighting and backgrounds.

## EDUCATION
